

# Why Your District Needs Vanco Fee Management

**Activate Vanco's Fee Management feature to help streamline payment tracking and collection.**

A RevTrak Web Store brings all your district fees online. With Fee Management, school districts can assign fees directly to students, and then parents can make payments without hunting for fees on the RevTrak Web Store. For non-assigned fees like donations and spirit wear, use a standard Web Store item.

## Vanco's Fee Management helps districts...

- 1. Streamline the payment collection process.** Many district fees are required. Fee Management makes collecting these fees easier for the district and parents.
- 2. Assign fees based on student criteria.** Avoid manual work and easily assign required fees to students by class, grade, gender and more in just a few clicks.
- 3. Make fee discovery easy for staff and parents.** Create efficiency in your district with Fee Management. Give parents an easy way to discover the fees they owe and reduce parent phone calls to the office.
- 4. Set fees based on Free/Reduced status.** Make it easier on authorized staff with a tool that can identify if a student is F/R and adjust the price according to preset parameters.
- 5. Easily track overdue fees.** Vanco's *Fee Balances Report* lists all outstanding fees by student. This report can be customized with filters to limit by term, department, account code or fee type.

### Make use of other Fee Management capabilities:

- Parents and admins can see fees with a remaining balance
- Allow parents to make partial payments
- Assign fee due dates
- Add fee descriptions

**Are you ready to make parents happy by simplifying school payments?**
